

Life expectancy on the Monon Trail graphic

Image shows a section of the Monon trail, from I-465 on the north to the I-65/I-70 north split on the south, with different life expectancies called out in type for different locations of Indianapolis along the trail.

The average life expectancy in the areas around where the Monon meets I-465 is 83.5 years.

Near where the Monon crosses 86th Street, the life expectancy is 81.5 years.

Near where the Monon traverses Broad Ripple, the life expectancy is 80.0 years.

Near where the Monon crosses 38th Street, the life expectancy is 74.5 years.

Close to where the Monon crosses 30th Street, the life expectancy is 74.8 years.

Where the Monon is near the I-65/I-70 north split, the life expectancy is 69.4 years.
