

Solar eclipse at IU graphic

Next to the IU trident at the top of the page is the headline “Solar Eclipse at IU” with the subhead of “When to look and what you’ll see:” The word look has an asterisk next to it, which refers to a note at the bottom of the graphic which says, “Don’t look at the eclipse without proper eye protection, such as a certified solar viewer or a pinhole projector.”

Underneath the headline and subhead is a list of all eight Indiana University campuses with the times that the eclipse will be visible in each area. Next to the list is a map of Indiana, covered with small sun graphics that represent where each IU campus is in the state with percentages underneath each sun that show how much sun coverage that campus will receive. The two parts of the graphic display the following information:

- IU Bloomington, 12:57 to 3:49 p.m. Eastern Time, Peak: 2:25 p.m., Sun coverage: 93.9 percent
- IUPUI, 12:57 to 3:48 p.m. Eastern Time, Peak: 2:25 p.m., Sun coverage: 91.5%
- IU East, 1:00 to 3:50 p.m. Eastern Time, Peak: 2:27 p.m., Sun coverage: 89.5%
- IU Kokomo, 12:57 to 3:47 p.m. Eastern Time, Peak: 2:24 p.m., Sun coverage: 89.1%
- IU Northwest, 11:54 a.m. to 2:43 p.m. Central Time, Peak: 1:20 p.m., Sun coverage: 87.2%
- IUPUC, 12:58 to 3:49 p.m. Eastern Time, Peak: 2:26 p.m., Sun coverage: 92.0%
- IU South Bend, 12:57 to 3:44 p.m. Eastern Time, Peak: 2:22 p.m., Sun coverage: 85.5%
- IU Southeast, 1:04 to 3:52 p.m. Eastern Time, Peak: 2:30 p.m., Sun coverage: 95.7%
